PROJECTS

GenieBikez Ecommerce

Developed GenieBikez platform using Next.js, with server-side rendering, client-side caching, SEO, and Redux for efficient state management. Delivered a scalable, high-performing platform for bike buying/selling.

Marble Ecommerce

Built a website for a marble seller, showcasing their products using Next.js on the client-side and Node, Express, and MongoDB on the server-side. Implemented server-side rendering, client-side caching, and SEO for fast and smooth browsing. Provides visitors with an easy way to explore products and make inquiries.

Community Web Application

we developed this project for an MLA to manage employees and conduct surveys. I have implemented front-end using Next.js with server-side rendering, client-side caching, SEO, and Redux for efficient state management.

EXPERIENCE

Frontend Developer at DotLinker Tech.

- responsive design
